June 16, 2015

Summer Winds Condominiums, Inc. Attn: Ms. Dale Williford, Executive Director 1505 Salter Path Road South Indian Beach, North Carolina 28575

Dear Ms. Williford;

On June 12, 2006, we completed an on-site inspection of Summer Winds Condominiums, Inc.' common area reserve items. Data gleaned from this inspection was utilized in the completion of an original reserve study report published on November 13, 2006. This reserve study report is an update of that previous reserve study report, which was accepted as accurate and reliable by the association representatives. A GAB Robins representative did re-inspect the common area reserve items for use in completion of this update reserve study report, on May 4, 2015.

The intent of this report is to show cash reserves necessary for the future repair or replacement of expendable components incorporated into the subject property. The purpose of this report is to aid Summer Winds Condominiums, Inc. in making a determination for cash reserves that are needed to repair or replace short-lived building and/or site components.

The report identifies each component selected, it's estimated useful life, adjusted life, scheduled replacement date, and current cost to repair/replace. The useful and remaining lives of the building components in this study, as well as the current replacement costs, have been selected from market standards, cost estimating services, and consideration of actual recent costs incurred by the association for reserve upgrades. This report is classified as an update reserve study with site visit under the guidelines of the National Reserve Study Standards of the Community Associations Institute, and conforms to the Community Associations Institute Professional Reserve Specialist Code of Ethics. The Reserve Specialist/GAB Robins have no relationships with the association that would result in actual or perceived conflicts of interest.

This report is our opinion and based upon observed conditions and state of repair. Actual determinations of the current conditions and state of repair for certain items may be beyond the scope of this analysis. Items may not last as long as projected or may exceed their estimated lives. Influences such as weather, catastrophe, improper maintenance, physical abuse, or abnormal use can affect these lives and/or replacement costs. When such occurrences happen, another inspection should be made and a new revised study prepared. While we have attempted to create a useful tool for the association to plan their needs, the actual reserves set aside are solely at the association's discretion. The findings of this study are not for use in performing an audit, quality/forensic analyses, or background checks of historical records.

			÷
			•
			•
		,	, .

In completing this report, the reserve specialist utilized information taken from the original inspection and reserve study report, as well as observed conditions as of the date of our most recent re-inspection. No destructive testing methods (i.e. roof core sampling, etc.) were utilized during the inspection. Reserve line items were added for exterior walkway and balcony railings and sewage treatment plant repair/replacement. Current financial data, including the actual or projected reserve fund balance(s) as of the analysis date, and property histories, provided by you and Ms. Connie McKenzie, Bookkeeper, were utilized in the completion of this report. This data was not audited, and was assumed to be complete and correct. The reserve specialist estimated the repair/replacement cost taking into account contingencies inherent to this type of work. The report was prepared utilizing the information gathered in the field and the costs estimated by the reserve specialist.

Respectfully submitted, GAB Robins, A Division of Cunningham Lindsey

Stephen F. Brubaker, RS #65 Reserve Specialist, Community Associations Institute

# **PROJECT OVERVIEW**

The subject of this reserve study report is the common areas within the Summer Winds Condominiums, Inc., a 211 unit residential resort development located on the Atlantic Ocean in Indian Beach, North Carolina. Originally constructed in 1983, the common areas include three residential buildings (Phase 1, 5 stories, 92 units; Phase 2, 6 stories, 65 units; and Phase 3, 5 stories, 54 units), each with a central pool/spa deck, administrative/rental office building, sports complex/recreation center with indoor pool and spa, racquetball courts, exercise room, basketball court and two tennis courts, guardhouse with security entry/exit gates and keypad entry system, small grounds/maintenance building, sewage treatment plans, asphalt paved parking and drives, concrete walkways/sidewalks, concrete curbing and paving, site lighting, signage, dune crossovers and wood sun decks, fencing and gates, landscaping and irrigation systems, etc.

The residential buildings are all of concrete frame/superstructure construction, with fire alarm systems, exterior corridors and unit lanais (with waterproof membrane systems), painted stucco and brick exteriors finishes, average intensity fenestration, and flat membrane roof covers. Access to the upper floors is via hydraulic passenger elevators and stairway cores. There is a limited amount of enclosed common area space at these buildings; Building 1 includes a small restaurant space (Ginger's Café), with tile flooring, inventories of average quality furniture/furnishings and of commercial grade restaurant equipment. Each of the buildings is designed so that all of the units enjoy direct ocean views, as well as a central pool deck. The pools are of standard concrete construction, with concrete decking, perimeter fencing, lighting, landscaping, and inventories of furniture and equipment. The Building 1 pool area also supports a spa. It was assumed that repair/replacement of the exterior windows, doors/frames and balcony deck finishes at the individual units are the financial responsibility of the unit owners and not the association.

The sports complex is a two story structure with painted stucco/siding exteriors, pitched metal roofing, and an attached natatorium with swimming pool and spa. The pool and spa are also of standard concrete construction, with concrete decking and inventories of furniture and equipment. The sports complex supports an exercise room, men's and women's locker/restrooms with sauna, game room, administrative office space, and miscellaneous storage and mechanical rooms. The interior finishes include ceramic tile and carpet flooring, painted interior walls, drop acoustical tile/textured ceilings, and average quality furniture/furnishings. Air conditioning is via split HVAC and package unit systems. The tennis courts (asphalt paved) and basketball court (concrete paved) are located adjacent to this building; the tennis courts are fenced, and both the tennis courts and basketball court are lighted.

The rental office building is a single story, wood frame building with painted wood siding exteriors and a flat membrane roof cover. This building has a covered patio area, with wood decking and railings and bridge access. The interiors support multiple administrative office areas, with painted interior walls, carpet flooring, vaulted ceilings, and average quality furniture/furnishings. The guardhouse is a wood frame structure with painted wood siding exteriors and pitched shingle roof covers.

As of the date of our latest physical inspection, the walkway railings at the residential buildings were in poor condition, and will be replaced during a 2015 restoration project. The buildings all appear to be in need of exterior painting and waterproofing, which will also reportedly be completed in 2015. The asphalt paving was observed to be heavily deteriorated and at the end of its useful life, and the pool and

sports complex restrooms dated in appearance. The tennis court surfaces and fencing/gates were observed to be in poor condition. No other items of significant deferred maintenance were noted.

Reserves are only calculated for the replacement of short-lived building or site components. This includes components that require replacement prior to the overall estimated end life of the buildings or structures. This report is designed to provide reasonable, appropriate budgetary cost and useful life data based on market standards for the subject's property type. We are unaware of any governmental or private reserve requirements.

GAB Robins, A Division of Cunningham Lindsey

# RESERVE STUDY FUNDING ANALYSIS

There are two generally accepted means of estimating reserves; the Cash Flow Analysis and the Component Funding Analysis methodologies. The Cash Flow Analysis (or Pooling Method) is a method of calculating reserve contributions where contributions to the reserve funds are designed to offset the variable annual expenditures from the reserve fund. This analysis recognizes interest income attributable to reserve accounts over the period of the analysis. Funds from the beginning balances are pooled together and a yearly contribution rate is calculated to arrive at a positive cash flow and reserve account balance to adequately fund the future projected expenditures throughout the period of the analysis.

In our Cash Flow Analysis calculations, we do not include percentage increases in construction costs/inflation. While future costs are expected to be higher than today's costs, which is supported by our analysis of past indexes/trends, increases in costs should be recognized as the association estimates current repair/replacement costs during their annual calculations of full reserve funding. A current cost estimate during the current fiscal year would theoretically be lower than a current cost for future fiscal years. That way the estimates of current cost moving forward will eventually represent current costs as of the date of forecast expenditure. Funding the reserves annually on that basis should ensure that adequate monies are available as of the date of expense, assuming that the current cost estimate is appropriate and that the reserve was fully funded since its last repair/replacement project was completed.

The Component Funding Analysis (or Straight Line Method) calculates the annual contribution amount for each individual line item component by dividing the component's unfunded balance by its remaining useful life. A component's unfunded balance is its replacement cost less the reserve balance in the component at the beginning of the analysis period. The annual contribution rate for each individual line item component is then summed to calculate the total annual contribution rate for this analysis.

# **EXECUTIVE SUMMARY**

# **PROPERTY DATA**

**Property Name:** Summer Winds

Property Location: Indian Beach, North Carolina

**Property Type:** Condominium

Total Units: 211

Report Run Date: June 165, 2015 Budget Year Begins: October 1, 2015 Budget Year Ends: September 30, 2016

## PROJECTED COMPONENT CATEGORIES AND PARAMETERS

Component Categories in Reserve Analysis:

- 1. Building Exteriors
- 2. Common Area Interiors
- 3. Mechanical/Electrical
- 4. Painting & Waterproofing
- 5. Pavement
- 6. Recreational Amenities
- 7. Roofing
- 8. Site Improvements

Total current cost of all reserve components in reserve analysis:	\$ 6,603,401
Estimated beginning reserve fund balance for reserve analysis:	\$ 145,608
Total number of components scheduled for replacement in the 2015/2016 budget year:	14
Total cost of components scheduled for replacement in the 2015/2016 budget year:	\$ 1,022,309

# ANALYSIS RESULTS - CASH FLOW ANALYSIS

Current annual reserve funding contributions amount (2014/2015 Budget):	\$ 100,968
Recommended annual reserve funding contribution amount:	\$ 876,000
Increase (decrease) between current and recommended annual contribution amounts:	\$ 775,032
Increase (decrease) between current and recommended annual contribution amounts:	\$ 768%

# ANALYSIS RESULTS - COMPONENT FUNDING ANALYSIS

Current annual reserve funding contributions amount (2014/2015 Budget):	\$ 100,968
Recommended annual reserve funding contribution amount:	\$ 1,458,258
Increase (decrease) between current and recommended annual contribution amounts:	\$ 1,357,290
Increase (decrease) between current and recommended annual contribution amounts:	1,344%

# RESERVE BUDGET COMPARISON

The previous page provides a comparison of the association's approved fiscal year 2014/2015 reserve contribution level and our estimates for full reserve funding for fiscal year 2015/2016. The funding requirements estimated for fiscal year 2015/2016 via both the Cash Flow Analysis and the Component Funding Analysis methodologies are significantly higher than the association's approved fiscal year 2014/2015 contribution level. Based on our analyses, the association is experiencing a near term reserve underfunding scenario; a total of +/- \$1,022,000 in reserve expenditures is scheduled in fiscal year 2015/2016, while the association expects to carry a reserve fund balance of just over \$100,000 into fiscal year 2015/2016. Continuing to fund the reserves as included in this report at the association's approved fiscal year 2014/2015 contribution level will necessitate future special assessment(s) and/or loan(s) to offset the planned reserve expenditures.

Based on the Cash Flow Analysis methodology, the association can fully fund the reserves as analyzed in this report at \$876,000 in fiscal year 2015/2016. This level of annual funding could remain stable in fiscal year 2016/2017; as of fiscal year 2017/2018, when the near future reserve expenditures will have been funded/completed, a decrease to \$280,320 is indicated. That level of annual reserve funding could remain stable over the remainder of the study period. This funding plan would provide adequate funds to offset planned reserve expenditures, and maintain a positive reserve fund balance over the entirety of the study period. The primary reason for the much higher funding requirements in the first two years is the near term reserve underfunding scenario; the association must "play catch up" to reach full/stabilized reserve funding levels. In this analysis we have utilized a 0.45% rate of return on reserve funds invested over the study period (assuming safe investment in CDs, money market accounts, etc.). The Cash Flow Analysis utilizes a pooling effect with reserve funds by pooling all funds together and distributing these funds to individual components as their replacement comes due. Funds that are pooled together in the cash flow analysis include the beginning balance, contributions to the reserve funds and interest earned on reserve funds. These pooled funds are matched against reserve expenditures throughout the period of the analysis by using our reserve analysis software program to ensure that the available funds are always greater than expenditures.

Based on our Component Funding Analysis model, the reserves as analyzed in this report suggest that in order to fully fund in fiscal year 2015/2016, the contribution should be \$1,458,258. The Component Funding Analysis is a straight-line accounting procedure that was previously mandated by the State of Florida for condominiums, and has been a popular method of reserve computation by condominiums, cooperatives, homeowner's associations, property owner's associations, country clubs, etc.

910-000-0025		06/01/1983	06/01/2023	7:08	40:00	2700.00 \$	190,080.00	\$	190,080.00
						\$	190,080.00	\$	190,080.00

### Comments

At some point in the foreseeable future, the association should expect to incur costs for replacement of the balcony railings, which were assumed to be limited common elements and therefore the financial responsibility of the association. Replacement is sometimes completed in conjunction with major concrete restoration; we have observed life cycles for railings replacement after less than 25 years, while some properties of 40+ years in age have yet to complete replacement. The 2015 exterior restoration project will reportedly not include the balcony railings; this fund is designed to provide monies for as needed repairs to and eventual replacement of these railings over a 40 year life cycle. The current per linear foot cost estimate includes removal and disposal of the existing railings, typical minor concrete repairs, and installation of railings of similar height/quality.

						\$	348,300.00 \$	348,300.00	

### Comments

The railings/panels at the exterior walkways were observed to be in only fair condition, and the association expects to replace as a portion of a 2015 exterior restoration/waterproofing project. We have observed life cycles for railings replacement after less than 25 years, while some properties of 40+ years in age have yet to complete replacement. This fund is designed to provide monies for as needed repairs to the walkway railings/panels over a 30 year life cycle, based on an assumed summer/fall 2015 installation date. The current per linear foot cost estimate includes removal and disposal of the existing railings, typical minor concrete repairs, and installation of railings of similar height/quality.

						s	254,600.00	\$	254,600.00

### Comments

At some point in the foreseeable future, the association should also expect to incur costs for replacement of the metal stairways at the residential buildings, which appear to be original to the property. It was assumed that repairs/restorations will be completed as a portion of the 2015 exterior restoration/waterproofing project, as areas of deterioration were noted. This fund is designed to provide monies for as needed repairs to and eventual replacement over a 40 year life cycle.

Code	Description	Date	Date	Life	Life	Quantity	Current	Future	
910-000-0009		06/01/2003	09/01/2016	0:11	13:03	7.00 \$	40,320.00	\$ 40,320.00	
						\$	40,320.00	\$ 40,320.00	

### Comments

Major cosmetic refurbishment of passenger elevator cabs (flooring, wall finishes, ceilings/lighting, etc.) has been observed on life cycles in the 15-20 year range in properties of similar overall quality, with the most typical falling on the higher end of the range. The date of completion of the most recent project was not confirmed; this report assumes that cosmetic renovations will be completed concurrently with mechanical modernization, and a 2016 expense date scheduled accordingly.

Ginger's Cafe, Equipment Allowance

Item Number	6	Measurement Basis	lp sm
Туре	Common Area	Estimated Useful Life	10:00
Category	Common Area Interiors	Basis Cost	20,000.00
Tracking	Logistical	Salvage Value	\$ 0.00
Method	Adjusted		

		Service	Replace	Rem	Adj		Replacement Cost	
Code	Description	Date	Date	Life	Life	Quantity	Current	Future
910-000-0006		01/01/2006	09/01/2017	1:11	11:08	1.00 \$	20,000.00	\$ 20,000.00
						\$	20,000.00	\$ 20,000.00

#### Comments

This fund is designed to provide monies for periodic expenditures associated with major kitchen equipment replacement in Ginger's Café. Since total inventory replacement will not likely be necessary at any one given time under normal operating conditions, we forecast that on a recurring 10 year life cycle, 25% of the total replacement cost will be incurred for as needed replacements. The next major expense was forecast in 2017, with the scheduled furniture/furnishings and tile flooring expenses. This fund is a projection only; actual costs and time frames may vary from our estimates.

#### Ginger's Cafe, Furn./Finishes Allowance

Item Number	5	<b>Measurement Basis</b>	sq ft
Туре	Common Area	<b>Estimated Useful Life</b>	12:00
Category	<b>Common Area Interiors</b>	Basis Cost	16,000.00
Tracking	Logistical	Salvage Value	\$ 0.00
Method	Adjusted		

		Service	Replace	Rem	Adj	_	Replacement Cost		
Code	Description	Date	Date	Life	Life	Quantity	Current	Future	
910-000-0005		01/01/2006	09/01/2017	1:11	11:08	1.00 \$	16,000.00 \$	16,000.00	
						<u></u>	16.000.00 \$	16,000.00	

#### Comments

To insure a modern cosmetic appeal, the association should expect to complete major common area furnishings projects on a periodic and regular basis. While minor additions/replacements/upgrades can be expected from time to time, a life cycle in the 10 to low 10 year range is the market norm we have observed. This fund is designed to provide monies for as needed furnishings and finishes in Ginger's Cafe, including wall and ceiling finishes, tables, chairs, bar stools, draperies/window treatments, wall art, etc. over a recurring 12 year life cycle. The next major expense was forecast in summer 2017.

Analysis Date - October 1, 2015

# **Item Parameters - Full Detail**

Ginger's Cafe, Tile Flooring

Item Number	3	Measurement Basis	sq ft
Туре	Common Area	Estimated Useful Life	30:00
Category	<b>Common Area Interiors</b>	Basis Cost	9.22
Tracking	Logistical	Salvage Value	\$ 0.00
Method	Adjusted		

		Service	Replace	Rem	Adj	Adj Replacement Cost		
Code	Description	Date	Date	Life	Life	Quantity	Current	Future
910-000-0003		06/01/1983	09/01/2017	1:11	34:03	2030.00 \$	18,716.60 \$	18,716.60
						\$	18,716.60 \$	18,716.60

#### Comments

At some point in the foreseeable future, the association should expect to incur costs for replacement of the common area tile flooring. Because replacement is typically completed due to cosmetic dissatisfaction rather than physical wear out/failure of the flooring itself, life cycles can vary from property to property; we have observed life cycles of less than 10 years, to over 30 years, for replacement of tile flooring. The tile flooring in Ginger's Cafe is reportedly original, suggesting an actual age of +/- 32 years. As such, the association should expect to incur replacement costs in the near future. As there were no reported plans to complete any cosmetic renovations in the near future, a summer 2016 expense date was forecast. The current cost estimate includes removal and disposal of the existing tile flooring and installation with like quality.

910-000-0008		06/01/1983	09/01/2016	0:11	33:03	1.00 \$	36,500.00 \$	36,500.00
						\$	36,500.00 \$	36,500.00

#### Comments

This fund refers to major third party restoration/renovation of the pool/beach restrooms interiors, including tile flooring, dividers/doors, plumbing and electrical fixtures, mirrors, etc. These interiors appear to be largely original to the property, and as such, renovation should be completed in the near future to insure a modern cosmetic appeal. As there were no reported plans to complete any common area renovations in 2015, a summer 2016 expense date was forecast.

### **Sports Complex, Carpeting**

Item Number	2	Measurement Basis	sq yds
Туре	Common Area	Estimated Useful Life	10:00
Category	Common Area Interiors	Basis Cost	25.71
Tracking	Logistical	Salvage Value	\$ 0.00
Method	Adjusted		

Service Replace Rem Adj					Replacement Cost				
Code	Description	Date	Date	Life	Life	Quantity	Current		Future
910-000-0002		06/01/1983	09/01/2016	0:11	33:03	415.00 \$	10,669.65	\$	10,669.65
						<u> </u>	10,669.65	\$	10,669.65

#### Comments

Life cycles of 5-6 years, to 15+ years, have been observed for replacement of carpeting in primary common area interiors (hallways, social rooms, exercise rooms, administrative offices, etc.); the useful life depends on the quality of carpeting, level of ongoing maintenance, and association cosmetic tastes. Based on the condition of this carpeting, and given that no cosmetic renovations are expected in 2015, a summer 2016 expense date was forecast. The current cost estimate includes removal and disposal of the existing carpeting and installation of like quality. The floor area estimate includes a typical market waste allowance.

### Sports Complex, Exercise Equipment

Item Number	1	Measurement Basis	lp sm
Туре	Common Area	<b>Estimated Useful Life</b>	10:00
Category	<b>Common Area Interiors</b>	Basis Cost	12,900.00
Tracking	Logistical	Salvage Value	\$ 0.00
Method	Fixed		

Service Rej			Replace Rem Adj	Adj	_	Replacement Cost		
Code	Description	Date	Date	Life	Life	Quantity	Current	Future
910-000-0001		09/01/2006	09/01/2016	0:11	10:00	1.00 \$	12,900.00 \$	12,900.00
						\$	12,900.00 \$	12,900.00

#### Comments

It is our market observation that while minor additions and/or replacements can be expected from time to time, better quality properties complete exercise equipment inventory replacements (treadmills, elliptical trainers, upright and recumbent exercise bikes, arc trainers, strength training stations, etc.) on a life cycle in the 10 year range, to insure the modern, appealing equipment is in use. This fund is designed to provide monies for as needed equipment replacements over a recurring 10 year life cycle. Based on the observed condition/age of the existing equipment and finishes, we would expect this expense in the near future. As there were no reported plans to make any significant exercise equipment/room upgrades in 2015, a summer 2016 expense date was forecast. The current lump sum cost estimate is an order of magnitude figure based on the size and quality of the existing inventory.

#### Comments

Some associations establish and fund reserves to provide funds for the possibility of financial losses due to hurricane/storm damage and/or insurance deductibles. Unlike say painting or roof replacement, there is no market standard for this type of reserve; some associations choose to reserve very aggressively, while others more conservatively. On that basis, we include this type of reserve only when provided an association's funding goal in total dollars and time frame in which to reach that goal. At such time as the association provides a budgetary insurance reserve funding goal and time frame in which to reach that goal, this report can be amended to include this component.

910-000-0017		02/01/2014	02/01/2036	20:04	22:00	15.00 \$	24,908.25	\$ 24,908.25
						\$	24,908.25	\$ 24,908.25

#### Comments

The common area mechanical equipment inventory includes a domestic water booster pump station/system, with three 5 hp pumps, controller panel, and associated equipment. Assuming periodic pump rebuilds, motor replacements, controller upgrades, etc. as a function of routine maintenance, modernization/replacement of standard domestic water pumps and equipment has a market indicated life cycle in the low to mid 20 year range.

910-000-0010		06/01/1983	09/01/2016	0:11	33:03	7.00 \$	573,230.00 \$	573,230.00
						ς	573 230 00 \$	573,230,00

#### Comments

The useful life of the electrical and mechanical components (motors, controllers, door operators, call buttons, etc.) of hydraulic elevators can range rather widely. Typically, this upgrade is driven by an association's dissatisfaction with elevator speed, smoothness of ride, and/or noise. We have observed hydraulic elevator modernization after +/- 25 years, to over 40 years; our data set reflects a mid-range 30 year life cycle as being the most typical. The existing equipment is largely original to the property, reflecting an actual age of +/- 32 years. As such, this expense should be expected in the near future. This project will reportedly not be completed during the 2015 exterior restoration project, and a summer 2016 expense date scheduled accordingly.

Excluded from this report are the hydraulic elevator jacks/pistons. Market data we have observed suggests that while major restoration/replacement can be necessary, it is not always necessary under normal market conditions. As such, it is our opinion that inclusion of reserves for jack/piston

		•
		*
		٠

Analysis Date - October 1, 2015

replacement is not prudent in the absences of a professional assessment(s) indicating that this upgrade will be necessary. In the event that such an assessment(s) determines that hydraulic jack/piston replacement is necessary, this report should be amended to include that reserve component.

						\$	177,240.00 \$	177,240.00	

#### Comments

Due to improvements in technology and/or parts obsolescence, major modernization of fire alarm system components (panels, pull stations, horns/strobes, detectors, hoses) is typically necessary on a 20-30 year schedule. A mid-range 25 year life cycle estimate reflects a 2031 expense date, based on the previously reported 2006 completion date.

Given ever changing technologies and/or changing fire codes, we recommend that as these systems age, a qualified life safety engineer(s) assess the subject's fire alarm systems periodically to determine more specific remaining useful life and cost parameters. We reserve the right to modify this report upon receipt of such an assessment(s).

						\$	4,050.53	\$	4,050.53

#### Comments

Life cycles in the mid-10 to low 20 year range have been observed for replacement of residential/commercial grade split HVAC air handler units in oceanside properties, assuming proper and routine maintenance. Changes to building codes have mandated that at the next replacement of an older, non-compliant condenser unit, the corresponding air handler must also be replaced so that both are brought up to more efficient, code compliant use. With the exception of the sports complex unit, which was assumed to be of the newer technology, the remaining useful lives were adjusted to reflect similar replacement dates as their matching condensers during the next replacement cycle; recurring 20 year life cycles were scheduled thereafter. The photographs are of representative air handlers.

910-000-0023		09/01/2015	09/01/2029	13:11	14:00	32350.00 \$	233,567.00 \$	233,567.00
						\$	233,567.00 \$	233,567.00

#### Comments

The 2015 exterior restoration project will reportedly include restoration/replacement of the waterproofing systems/traffic coatings on the common area corridors. The unit lanais are reportedly the financial responsibility of the owners and not the association, and as such, restoration/replacement of the waterproofing on the lanais was excluded from this report. It is our market observation that assuming proper installation and routine maintenance, life cycles in the low to mid 10 year range should be expected; we have observed other similar properties that complete this project at every other painting cycle, as a portion of a larger waterproofing project. This expense was scheduled again in 2029, and on a 14 year life cycle thereafter. The current cost estimate includes typical minor deck repairs.

Code	Description	Date	Date	Life	Life	Quantity	Current	Future
910-000-0022		09/01/2015	09/01/2022	6:11	7:00	211.00 \$	630,890.00 \$	630,890.00
						\$	630,890.00 \$	630,890.00

#### Comments

To insure proper protection of the underlying concrete, stucco, wood and metal surfaces, the market reflects a maximum 7 year useful life for exterior painting & waterproofing (in lieu of an association purchased 10 year warranty). This project will reportedly be completed in 2015 as a portion of the greater exterior restoration project, and a 2022 expense date scheduled accordingly. The current average per dwelling unit cost estimate includes typical minor concrete/stucco repairs, surface preparation, as needed window/sliding glass door caulking and painting/refinishing of all exterior concrete, stucco, wood and metal surfaces (including railings and window/slider frames).

# Summer Winds Analysis Date - October 1, 2015

A determination of the condition of the exterior concrete systems is beyond the scope of this report. While it is certain that some measure of concrete restoration will be necessary in any property of the subject's design and construction with exposure to the ocean elements, it is very difficult to quantify budgetary costs and remaining useful lives. Costs can range from as low as \$5,000 per unit to over \$60,000 per unit, and useful lives can range from as low as roughly 15 years to over 40 years. It is our market observation that very few associations establish and fund major concrete restoration reserves, given the relative uncertainty of cost and useful life; it is much more common for these upgrades to be funded (at least partially) via special assessment. No reserves for concrete restoration were included in this report. Should the association wish to include reserves for concrete restoration, a budgetary funding goal and useful life cycle would need to be provided.

						\$	191,908.35 \$	191,908.35

#### Comments

We have observed life cycles of less than 15 years, to 25+ years, for asphalt overlay projects, assuming proper design, installation and routine maintenance. The date of installation of the existing asphalt paving was not confirmed; it may indeed be original to the property. Areas of significant cracking/deterioration were noted, and it is our opinion that pavement replacement should be completed in the near future. Given the 2015 exterior restoration project, the remaining useful life was adjusted to reflect a summer/fall 2016 expense date. The current unit cost estimate includes milling/removal of the existing asphalt paving, typical minor repairs to the underlying pavement subbase and drainage systems, installation of new asphalt paving, and re-striping. The paved area is a rounded estimate.

910-000-0028		08/01/2013	08/01/2017	1:10	4:00	15615.00 \$	17,020.35	\$	17,020.35
						\$	17,020.35	\$	17,020.35

#### Comments

Sealcoating/rejuvenation of asphalt paving serves as not only a cosmetic upgrade; it also insures minimal moisture intrusion into the underlying pavement structure. Without a proper moisture barrier, premature deterioration in the form of potholes, etc. can occur, causing the need for more frequent (and costly) asphalt overlays. The market reflects a typical useful life of 3-4 years for this upgrade. Assuming a pavement replacement project in 2016, and based on observed industry standards that indicate that a sealcoating project should be completed within the first year of a new pavement installation project, this expense was scheduled in summer 2017. A recurring 4 year life cycle was scheduled thereafter. The current cost estimate includes typical minor pavement repairs and re-striping.

Method		Fixed						
		Service	Replace	Rem	Adj	_	Replace	ment Cost
Code	Description	Date	Date	Life	Life	Quantity	Current	Future
						\$	0.00 \$	0.00

Under normal conditions, total replacement of the common area plumbing lines/piping should not be necessary at any one given time. Therefore, it is our opinion that reserving for total replacement is not prudent or practical, which is supported by our review of reserve budgets at similar properties. While some associations do establish and fund contingency reserves for unpredictable and expected common area plumbing repairs, other associations prefer to fund unforeseen common area plumbing repairs (at least partially) via special assessment. The association expects to incur a cost on the order of \$24,000 in 2015 for repairs to the Building B standpipes, and future major expenses should be expected. At such time as the association can provide a budgetary funding goal and time frame in which to reach that goal, if a common area plumbing reserve is desired, this report can be amended accordingly.

910-000-0037		06/01/2005	01/01/2017	1:03	11:07	475.00 \$	8,398.00 \$	8,398.00
						\$	8,398.00 \$	8,398.00

#### Comments

Assuming proper and routine maintenance, including as needed board replacements, sealing, etc., third party restoration of the wood frame/deck ADA ramp at the sports complex (replacement of wood decking and railings, as needed repairs to underlying framing, stringers, pilings, etc.) should be expected on a life cycle in the 10-11 year range. Based on the observed condition, we estimate an effective age in the 10 year range and forecast this expense in 2017. The current cost estimate is not reflective of total replacement; under normal conditions, we do not anticipate the need for total replacement in the foreseeable future.

						\$	29,962.06	\$	29,962.06	

#### Comments

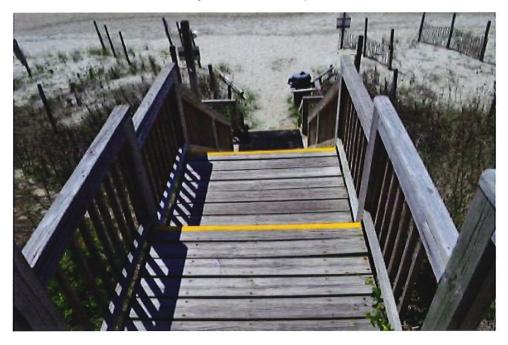

PRN:06/15/2015

Assuming proper and routine maintenance, including as needed board replacements, sealing, etc., third party restoration of the wood frame/deck dune crossovers (replacement of wood decking and railings, as needed repairs to underlying framing, stringers, pilings, etc.) should be expected on a life cycle in the 10-11 year range. Each was forecast for restoration on a recurring 11 year life cycle, accordingly, with summer 2016 expense dates. The current cost estimate is not reflective of total replacement; under normal conditions, we do not anticipate the need for total replacement in the foreseeable future.

#### Comments

While minor additions/replacements can be expected from time to time, and assuming periodic as needed re-strapping and/or refinishing as a function of routine maintenance, most associations complete pool deck furniture inventory replacements on a 7-10 year life cycle. This fund is designed to provide monies for as needed pool deck furniture replacements over a recurring 10 year life cycle. The current per piece cost estimate is an average figure for the differing types (i.e. chaise lounges, tables, chairs, umbrellas, trash receptacles, etc.).

						\$	0.00 \$	0.00

#### Comments

The existing pool and spa decks are concrete, and appear to be painted/sealed periodically as a function of routine maintenance. Under normal conditions, total replacement of concrete decking should not be necessary in the foreseeable future; it is our market observation that replacement of this type of decking is due to an association's desire for a more modern, appealing cosmetic look. Some upgrade to paver decking, others complete restoration projects including installation of decorative concrete surfaces (kool decking) or epoxy/acrylic finishes. As there were no reportedly plans to upgrade the existing pool decking, we have excluded it from this report. For the association's consideration, we estimate a current concrete topping restoration project cost on the order of \$70,000.

						\$	61,669.32	\$ 61,669.32

#### Comments

A life cycle in the low to mid 20 year range is the most typical useful life we have observed for replacement of standard aluminum pool/spa deck fencing and gates. Separate line items were included to provide monies for as needed repairs to and eventual replacement of the pool fencing/gates at each pool area, over 24 year life cycles. The current per linear foot cost estimate includes removal and disposal of the existing fencing and gates and installation of like height/quality fencing and gates.

Code	Description	Date	Date	Life	Life	Quantity	Current	Future	
910-000-0031		03/01/2015	03/01/2029	13:05	14:00	1.00 \$	10,525.00 \$	10,525.00	
						\$	10,525.00 \$	10,525.00	

#### Comments

Given the lesser exposure to the sun, interior resurfacing/restoration of the natatorium swimming pool should be expected on a slightly longer life cycle than the outdoor pools. A 14 year life cycle estimate reflects a 2027 expense date for this project, based on the reported spring 2015 completion date. The current cost estimate includes typical minor tank/structural repairs, tile upgrades and/or replacements, and installation of new aggregate surface materials (i.e. "diamond brite", "pebble crete", etc.), and is based on the approximate surface area of this free form pool.

Code	Description	Date	Date	Life	Life	Quantity	Current	Future
910-000-0034		06/01/2015	06/01/2025	9:08	10:00	1.00 \$	20,000.00 \$	20,000.00
						\$	20.000.00 \$	20.000.00

#### Comments

Under normal conditions, total replacement of pool and spa equipment inventories (pumps, motors, chlorination systems, filters, heaters, etc.) should not be necessary at any one given time. As such, reserving for total replacement is not considered prudent or practical. This is supported by our review of reserve budgets at similar properties; while some associations establish and fund contingency reserves for as needed repair/replacement costs, others prefer to fund incidental expenses through their annual operating budgets, as a function of routine maintenance. For the association's consideration, we have included an allowance to provide monies for as needed equipment replacements over a recurring 10 year life cycle. This fund is a projection only; actual costs and time frames may vary from these estimates. The current cost estimate is not reflective of total inventory replacement.

920-002-0035	Natatorium	03/01/2015	03/01/2023	7:05	8:00	1.00 \$	2,440.00	\$	2,440.00
						\$	4,880.00	\$	4,880.00

#### Comments

Given the higher temperatures and chemical concentrations, interior resurfacing of standard concrete spas with marcite or aggregate interiors is typically necessary on a shorter life cycle than similar pool interiors. Life cycles in the 7-10 year range have most typically been observed, assuming proper installation, chemical balancing and routine maintenance. Recurring 8 year life cycles were forecast for the Building A and natatorium spa interiors, accordingly.

						\$	11,732.00 \$	11,732.00	

#### Comments

Data gleaned from both within and outside the local market area indicates that under normal conditions, replacement of typical coated chain link tennis court fencing and gates should be expected on a life cycle in the low to mid-20 year range. The existing fencing/gates were observed to be in only fair condition, and may be original to the property; replacement will reportedly be completed prior to October 1, 2015, and a 2038 replacement date scheduled accordingly. The current per linear foot unit cost estimate includes removal and disposal of the existing fencing and gates and installation of like height/quality fencing and gates.

						\$	9,882.00	\$ 9,882.00

#### Comments

To insure proper protection of the underlying court structures and a high cosmetic appeal, the market reflects a range in useful life of 6-9 years for resurfacing of standard asphalt tennis courts. The tennis court surfaces were observed to be in fair to poor condition, with significant areas of cracking/deterioration noted. In our opinion, this project should be completed in the near future. The current per court cost estimate includes typical minor repairs to the underlying court structures and re-striping.

						\$	19,470.00 \$	19,470.00

#### Comments

The pitched metal roofing at the sports complex and residential buildings appear to be original, suggesting actual ages of +/- 32 years. It is our market observation that this type of roofing should have a useful life in the 25-30 year range, which indicates that replacement should be expected in the near future. This expense was forecast in 2016, accordingly. The total square footage is a rounded estimate.

						\$	0.00 \$	0.0

#### Comments

In our experience, some associations do establish and fund landscaping reserves, typically on a contingency basis for unforeseen storm damage, blight, etc. Because landscaping is largely cosmetic, costs and useful lives can vary, often widely, from property to property. Given this unpredictability, we include landscaping reserves only when provided current cost and useful life/remaining useful live parameters by an association, and then include at that association's sole discretion. At such time as the association can provide a budgetary funding goal and time frame in which to reach that goal for their common area landscaping, this report can be amended accordingly.

As needed upgrades to irrigation systems is typically funded through an association's annual operating budget, as a function of routine maintenance; we have not encountered an association that has established and funded a reserve for total replacement in the absence of an engineering report demonstrating the need and/or economic feasibility of total irrigation system replacement.

64,925.00 \$

64,925.00

### Comments

While minor replacements will be necessary on as needed, incidental basis, total inventory replacement of on-site poles/light fixtures is typically necessary on a 25-30 year life cycle. The existing inventory appears to be largely original to the property, suggests a major expense in the near future. This expense was forecast in 2016, to be completed with the scheduled asphalt paving and tennis court projects. The current cost estimate is based on the total of 35 poles/fixtures (tennis/sports courts, parking areas, pool decks) and an average per unit cost of \$1,855. It was assumed that replacement of the smaller pedestal, on building and landscaping lighting would continue to be funded through the association's annual operating budget, as a function of routine maintenance.

910-000-0050		06/01/1983	06/01/2019	3:08	36:00	1785.00 \$	25,828.95 \$	25,828.95
						\$	25,828.95 \$	25,828.95

### Comments

Given the more limited exposure to the sun, third party restoration of the wood frame/deck (replacement of wood decking and railings, as needed repairs to underlying framing, stringers, pilings, etc.) at the office building decks should be expected on a longer life cycle than the dune crossovers or ADA ramp. This decking is reportedly original to the property, suggesting an actual age of +/- 32 years. This is well beyond the typical useful life we have observed before major restoration is necessary. Based on its observed condition, we estimate that this project will be necessary in the next 3-5 years, and a 2019 expense date forecast accordingly. The current cost estimate is not reflective of total replacement; under normal conditions, we do not anticipate the need for total replacement in the foreseeable future.

		Service	Replace	Rem	Adj	_	Replac	ement Cost
Code	Description	Date	Date	Life	Life	Quantity	Current	Future
910-000-0045		06/01/2006	06/01/2022	6:08	16:00	1.00 \$	18,560.00	\$ 18,560.00
						\$	18,560.00	\$ 18,560.00

### Comments

Barring any unforeseen storm damages, etc., replacement of the shadowbox privacy fencing along the east and west property boundaries should be expected on a life cycle in the mid-10 year range. The most recent major expense was incurred in 2006, per prior discussions with the property manager, and a 2022 replacement date scheduled accordingly. The current cost estimate is an order of magnitude figure based on the approximate linear footage, and is reflective of third party replacement.

## **ADDENDUM**

		.*
		- •
		, .

## **TERMS AND DEFINITIONS**

ACCRUED FUND BALANCE (AFB): Total Accrued Depreciation. An indicator against which Actual (or projected) Reserve balance can be compared. The Reserve balance that is in direct proportion to the fraction of life "used up" of the current Repair or Replacement cost. This number is calculated for each component, then summed together for an association tool. Two formulae can be utilized, depending on the provider's sensitivity to interest and inflation effects. Note: both yield identical results when interest and inflation are equivalent.

AFB = Current Cost X Effective Age/Useful Life

or

AFB = (Current Cost X Effective Age/Useful Life) + [(Current Cost X Effective Age/Useful Life)/(1 + Interest Rate) ^ Remaining Life] – [(Current Cost X Effective Age/Useful Life) /(1 + Inflation Rate) ^ Remaining Life]

<u>CASH FLOW METHOD</u>: A method of calculating Reserve Funding Plan where contributions to the Reserve fund are designed to offset the variable annual expenditures from the Reserve fund. Different Reserve Funding Plans are tested against the anticipated schedule of Reserve expenses until the desired Funding Goal is achieved. "Because we use the cash flow method, we compute individual line item contributions after the total contribution rate has been established." See "Component Method".

<u>CAPITAL EXPENDITURES</u>: A capital expenditure means any expenditure of funds for: (1) the purchase or replacement of an asset whose useful life is greater than one year, or (2) the addition to an asset that extends the useful life of the previously existing asset for a period greater than one year.

<u>COMPONENT:</u> The individual line items in the Reserve Study, developed or updated in the Physical Analysis. These elements form the building blocks for the Reserve Study. Components typically are: 1) Association responsibility, 2) with limited Useful Life expectancies, 3) predictable Remaining Useful Life expectancies, and 4) above a minimum threshold cost, and 5) as required by local codes. "We have 17 components in our reserve Study."

<u>COMPONENT ASSESSMENT AND VALUATION:</u> The task of estimating Useful Life, Remaining Useful Life, and Repair or Replacement Costs for the Reserve components. This task is accomplished either with or without an on-site inspection, based on Level or Service selected by the client.

<u>COMPONENT FULL FUNDING:</u> When the actual (or projected) cumulative Reserve balance for all components is equal to the Fully Funded Balance.

<u>COMPONENT INVENTORY:</u> The task of selecting and quantifying Reserve Components. This task is accomplished through an on-site inspection, review of association design and organizational documents, and a review of established association precedents, and discussion with appropriate association representative(s).

<u>COMPONENT METHOD</u>: A method of developing a Reserve Funding Plan where the total contribution is based on the sum of contributions for individual components. "Since we calculate a Reserve contribution rate for each component and then sum them all together, we are using the component method to calculate our Reserve contributions." See "Cash Flow Method".

<u>CONDITION ASSESSMENT:</u> The task of evaluating the current condition of the component based on observed and reported characteristics.

**CURRENT REPLACEMENT COST:** See "Replacement Cost".

**<u>DEFERRED MAINTENANCE:</u>** Deferred maintenance means any maintenance or repair that: (1) will be performed less frequently than yearly, and (2) will result in maintaining the useful life of an asset.

**<u>DEFICIT:</u>** An actual (or projected) Reserve Balance less than the Fully Funded Balance. The opposite would be a Surplus.

**EFFECTIVE AGE:** The difference between Useful Life and Remaining Useful Life. Not always equivalent to chronological age, since some components age irregularly. Used primarily in computations.

<u>FINANCIAL ANALYSIS</u>: The portion of a Reserve Study where current status of the Reserves (measured as cash or Percent Funded) and a recommended Reserve contribution rate (Reserve Funding Plan) are derived, and the projected Reserve income and expense over time is presented. The Financial Analysis is one of the two parts of a Reserve Study.

<u>FULLY FUNDED</u>: When the budget is provided to the owners, it will show the amount of money that must be deposited that year for each reserve item to ensure that, when the time comes, sufficient funds will be available for deferred maintenance or a capital expenditure. (Definition published in "Budgets & Reserve Schedules Made Easy" training manual by the State of Florida Department of Business and Professional Regulations in January 1997).

**FUND STATUS:** The status of the reserve fund as compared to an established benchmark such as percent funding.

<u>FUNDING PLAN</u>: An association's plan to provide income to a Reserve fund to offset anticipated expenditures from that fund.

## **FUNDING PRINCIPLES:**

- Sufficient Funds When Required
- Stable Contribution Rate over the Years
- Evenly Distributed Contributions over the Years
- Fiscally Responsible

**<u>FUNDING GOALS</u>**: Independent of methodology utilized, the following represent the basic categories of Funding Plan goals:

- Baseline Funding Establishing a Reserve funding goal of keeping the Reserve cash balance above zero.
- Component Full Funding Setting a Reserve funding goal of attaining and maintaining cumulative Reserves at or near 100%.
  - Statutory Funding Establishing a Reserve funding goal of setting aside the specific minimum mount of Reserves of component required by local statutes.

## **ANNUAL UPDATE PROGRAM**

GAB Robins is pleased to offer our clients a program to provide annual updates to their Reserve Studies for the next three calendar years for a guaranteed fee.

The Update Program is valid only if there are no changes to the property, i.e. new construction, major upgrades, etc. Changes to the property within the three-year update program period would require a re-inspection of the property at a higher fee.

## Benefits:

- Annual Reserve Study updates on the property provide a written validation of reserve study needs.
- Demonstrates due diligence and impartiality on the part of the property manager and board members by the involvement of a third party professional.
- The cost of your update reserve study is lower if enrolled in the update program.
- Provides peace of mind to clients knowing that their property is adequately funded year after year.

If you have not already chosen to accept the three-year annual update program, and would like to do so at this time, please contact our bid proposal specialist at (407) 805-0086 x 257, or (800) 248-3379 x 257 (FL only) or fax your request to (407) 805-9921. We will be pleased to provide you with a bid for the three year annual program.
